

SURVEY ANALYSIS

PR 454: Batemen Competition

PREPARED BY MAGGIE HAYDEN

DEC 2022

The logo for the Public Relations Student Society of America (PRSSA) is displayed within a teal circle. It features the letters "PRSSA" in a large, white, serif font, with the "P" and "R" overlapping.The logo for the News Literacy Project is displayed within a teal circle. It features the words "News Literacy Project" in a white, sans-serif font, arranged in three lines.

OVERVIEW

We administered our survey to almost 200 WKU students to collect data regarding News Literacy among this age group.

Our survey was distributed to general education requirement courses and several convenience intercept surveys in populated campus areas to get a wide variety of diversity in results.

The following slides detail the results that were collected by the survey.

Demographics

19.2
Years Old

The average age of respondent was 19.2 years old.

Political Affiliation

39.9% Republican
36.8 % Democrat
19.7 % Independent

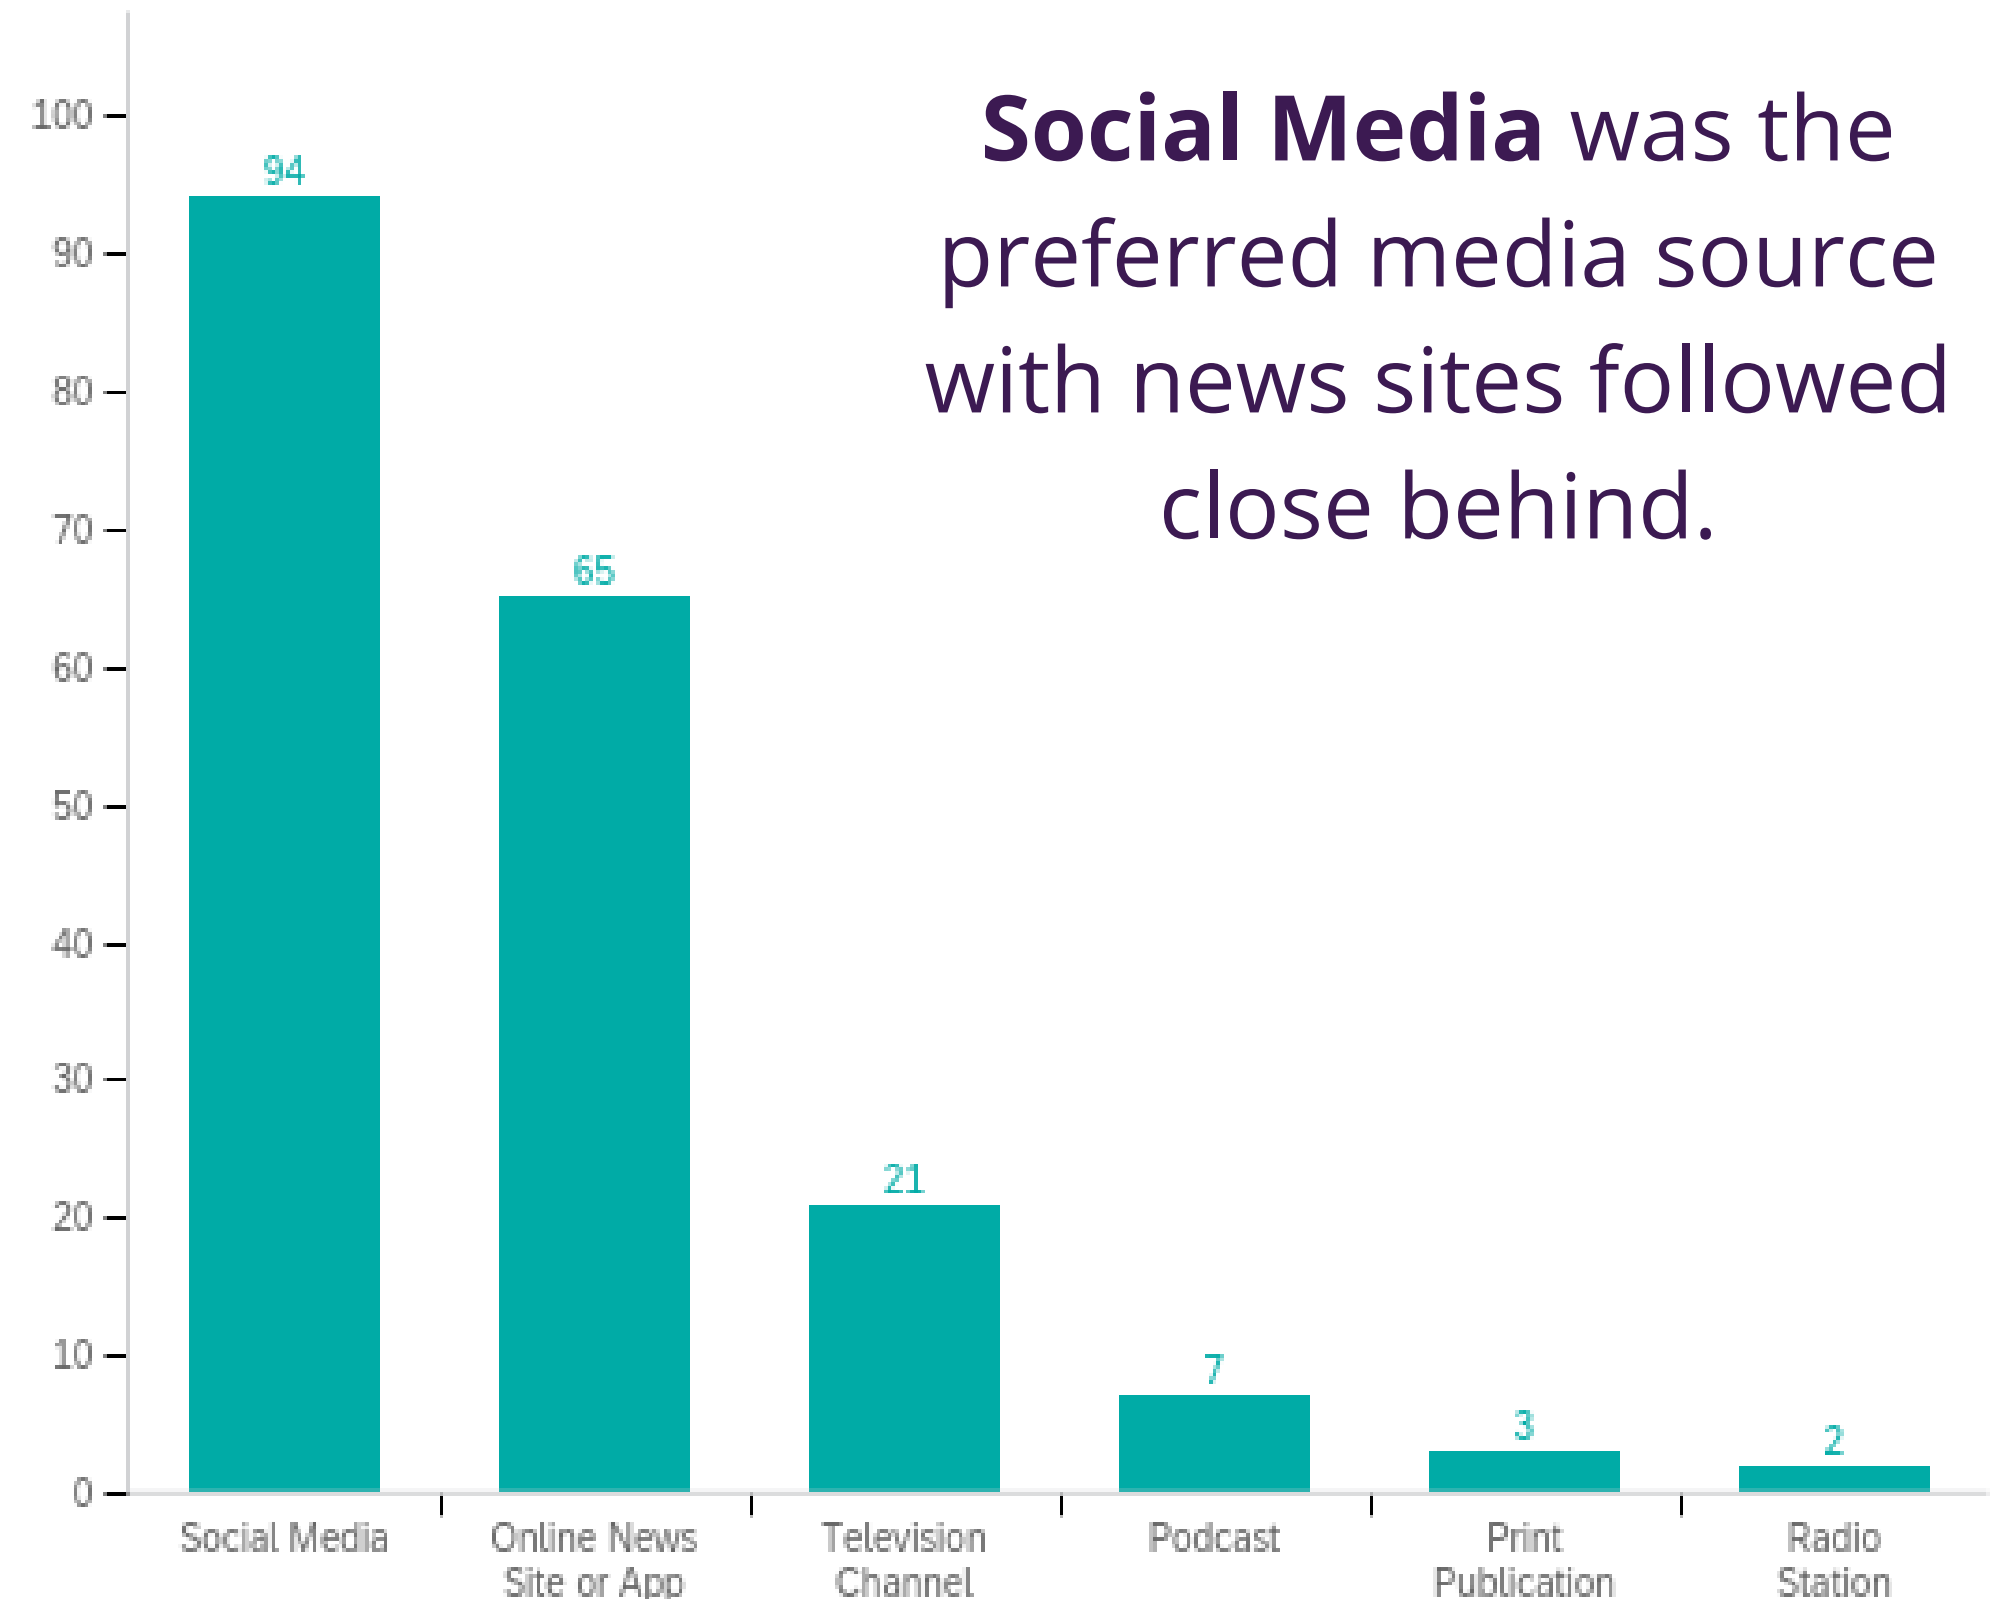

57.5%
Freshman

The majority of our sample consisted of freshman, making up 57.5% of respondents

MEDIA PREFERENCES

Out of 192 respondents, **167 people** preferred to get their news **from digital platforms most of the time** as opposed to print, television, or radio

SOCIAL PREFERENCES

- **Instagram**

Instagram was the preferred choice with **62** respondents regularly getting news from the platform at least most of the time.

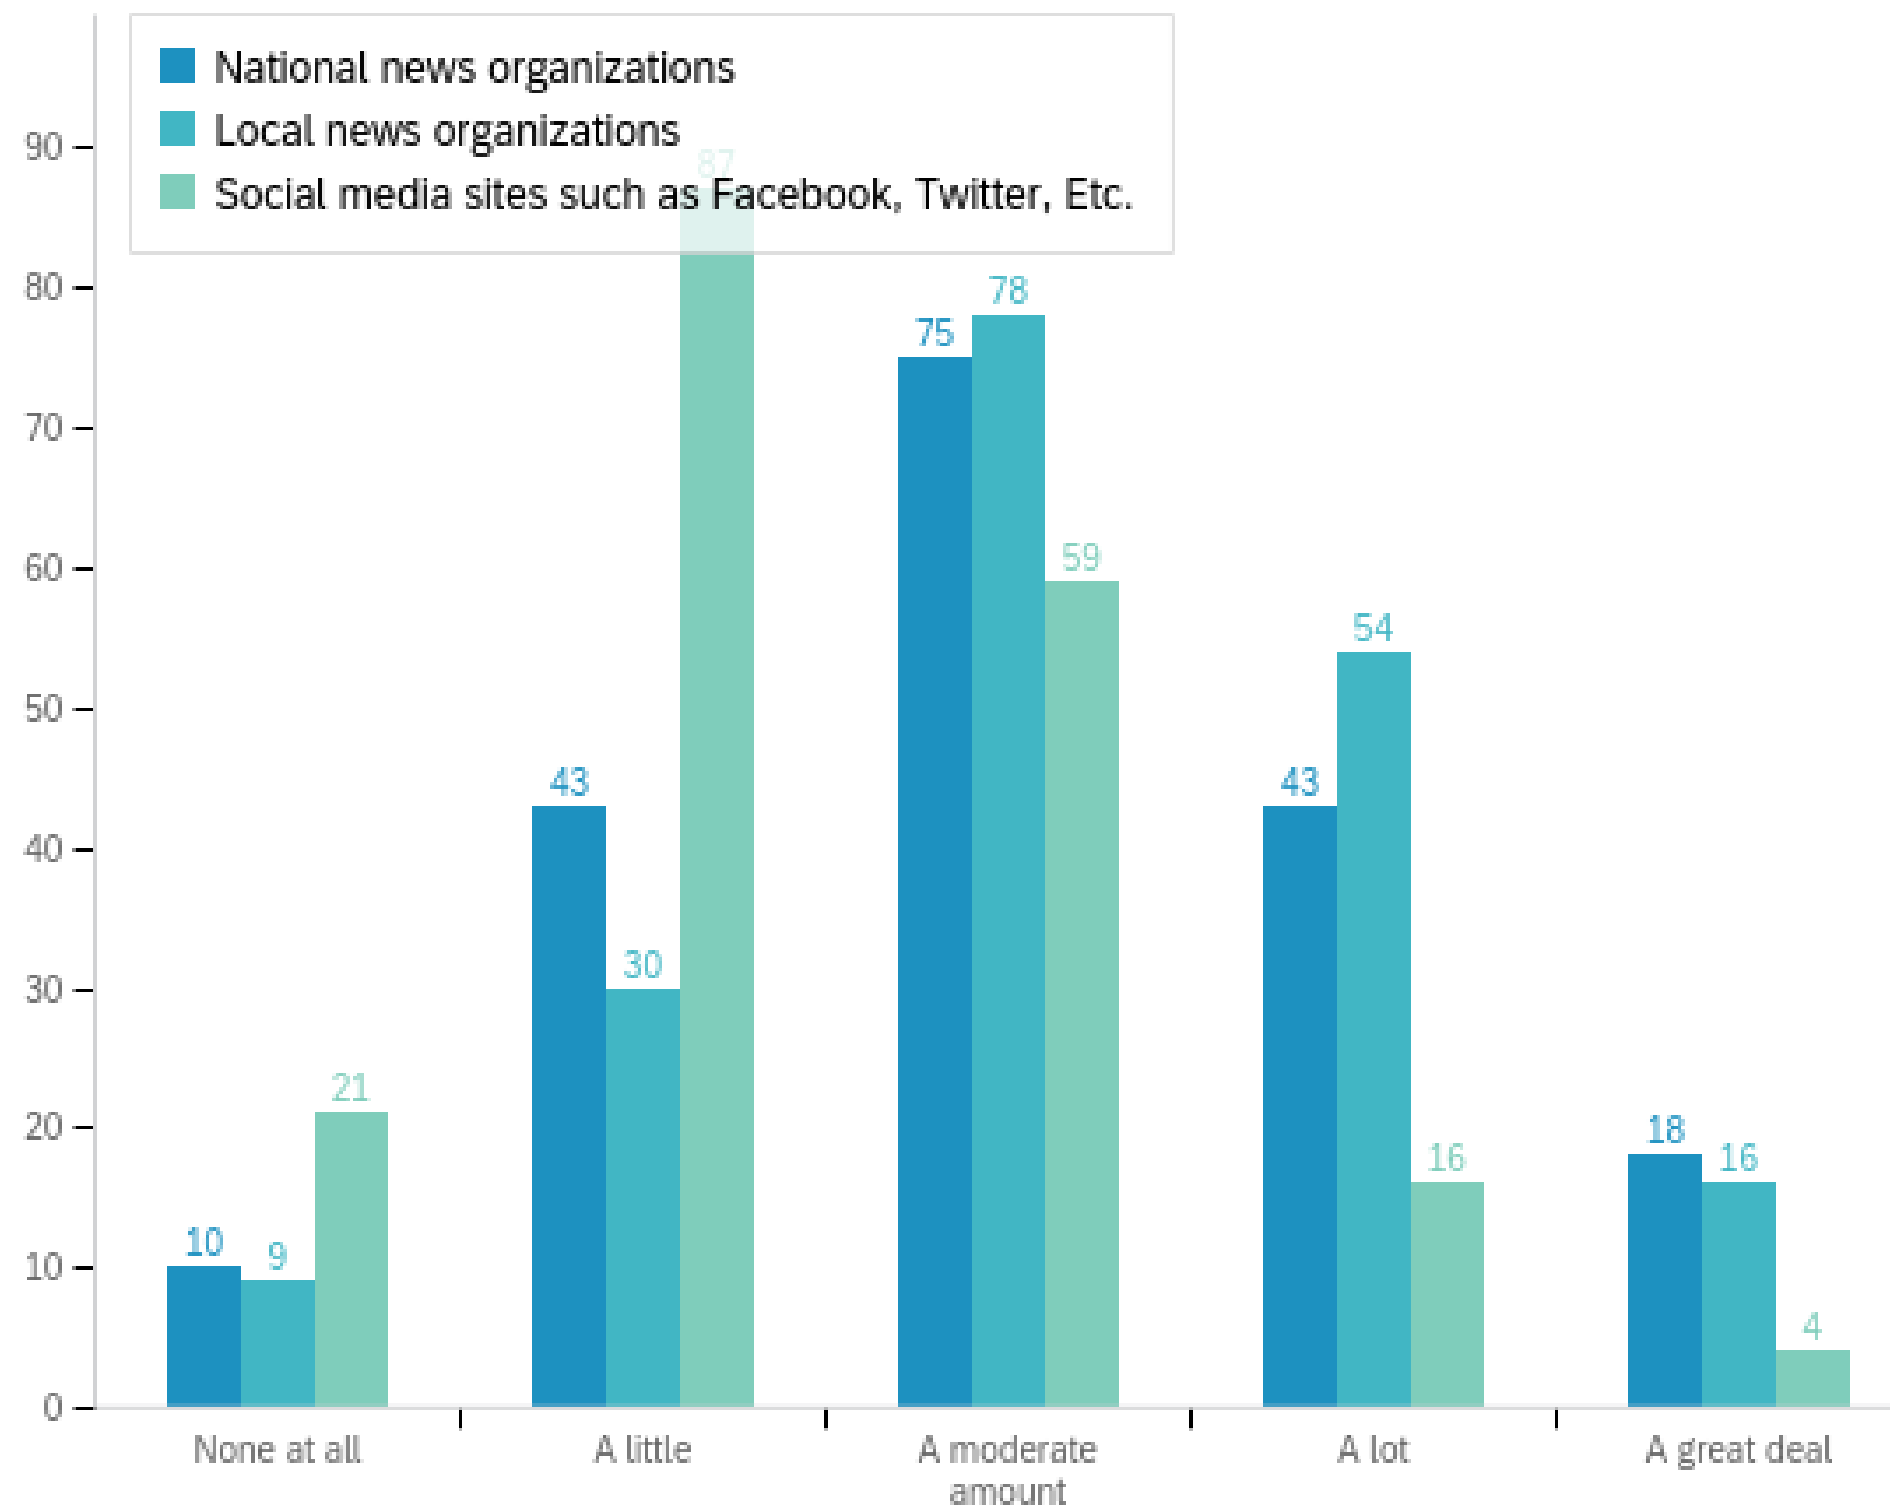

- **Tiktok**

Tiktok was next with **54** respondents regularly getting news from the platform at least most of the time.

- **Twitter**

Tiktok was third with **44** respondents regularly getting news from the platform at least most of the time.

MEDIA TRUST

While Social Media is the preferred choice for media, trust seems to be lacking.

87 respondents admit to only trusting the information from social media sites a little.

Local news organizations are trusted the most but a general theme of distrust is obvious among results.

FAKE NEWS IDENTIFICATION

When asked how often respondents felt they came across fake news across various platforms:

- Less preferred platforms were scored as less likely to encounter fake news (radio, print).
- While preferred platforms had a higher chance to encounter fake news (social, websites).

FAKE NEWS ATTITUDES

Percentage of respondents who find it "very important" and "extremely important" to be able to identify fake news

Percentage of respondents who feel that they can accurately identify fake news about half the time or more

FACT-CHECKING BEHAVIORS

93.1%

Percentage of respondents who find it at least moderately important to engage in fact-checking behaviors

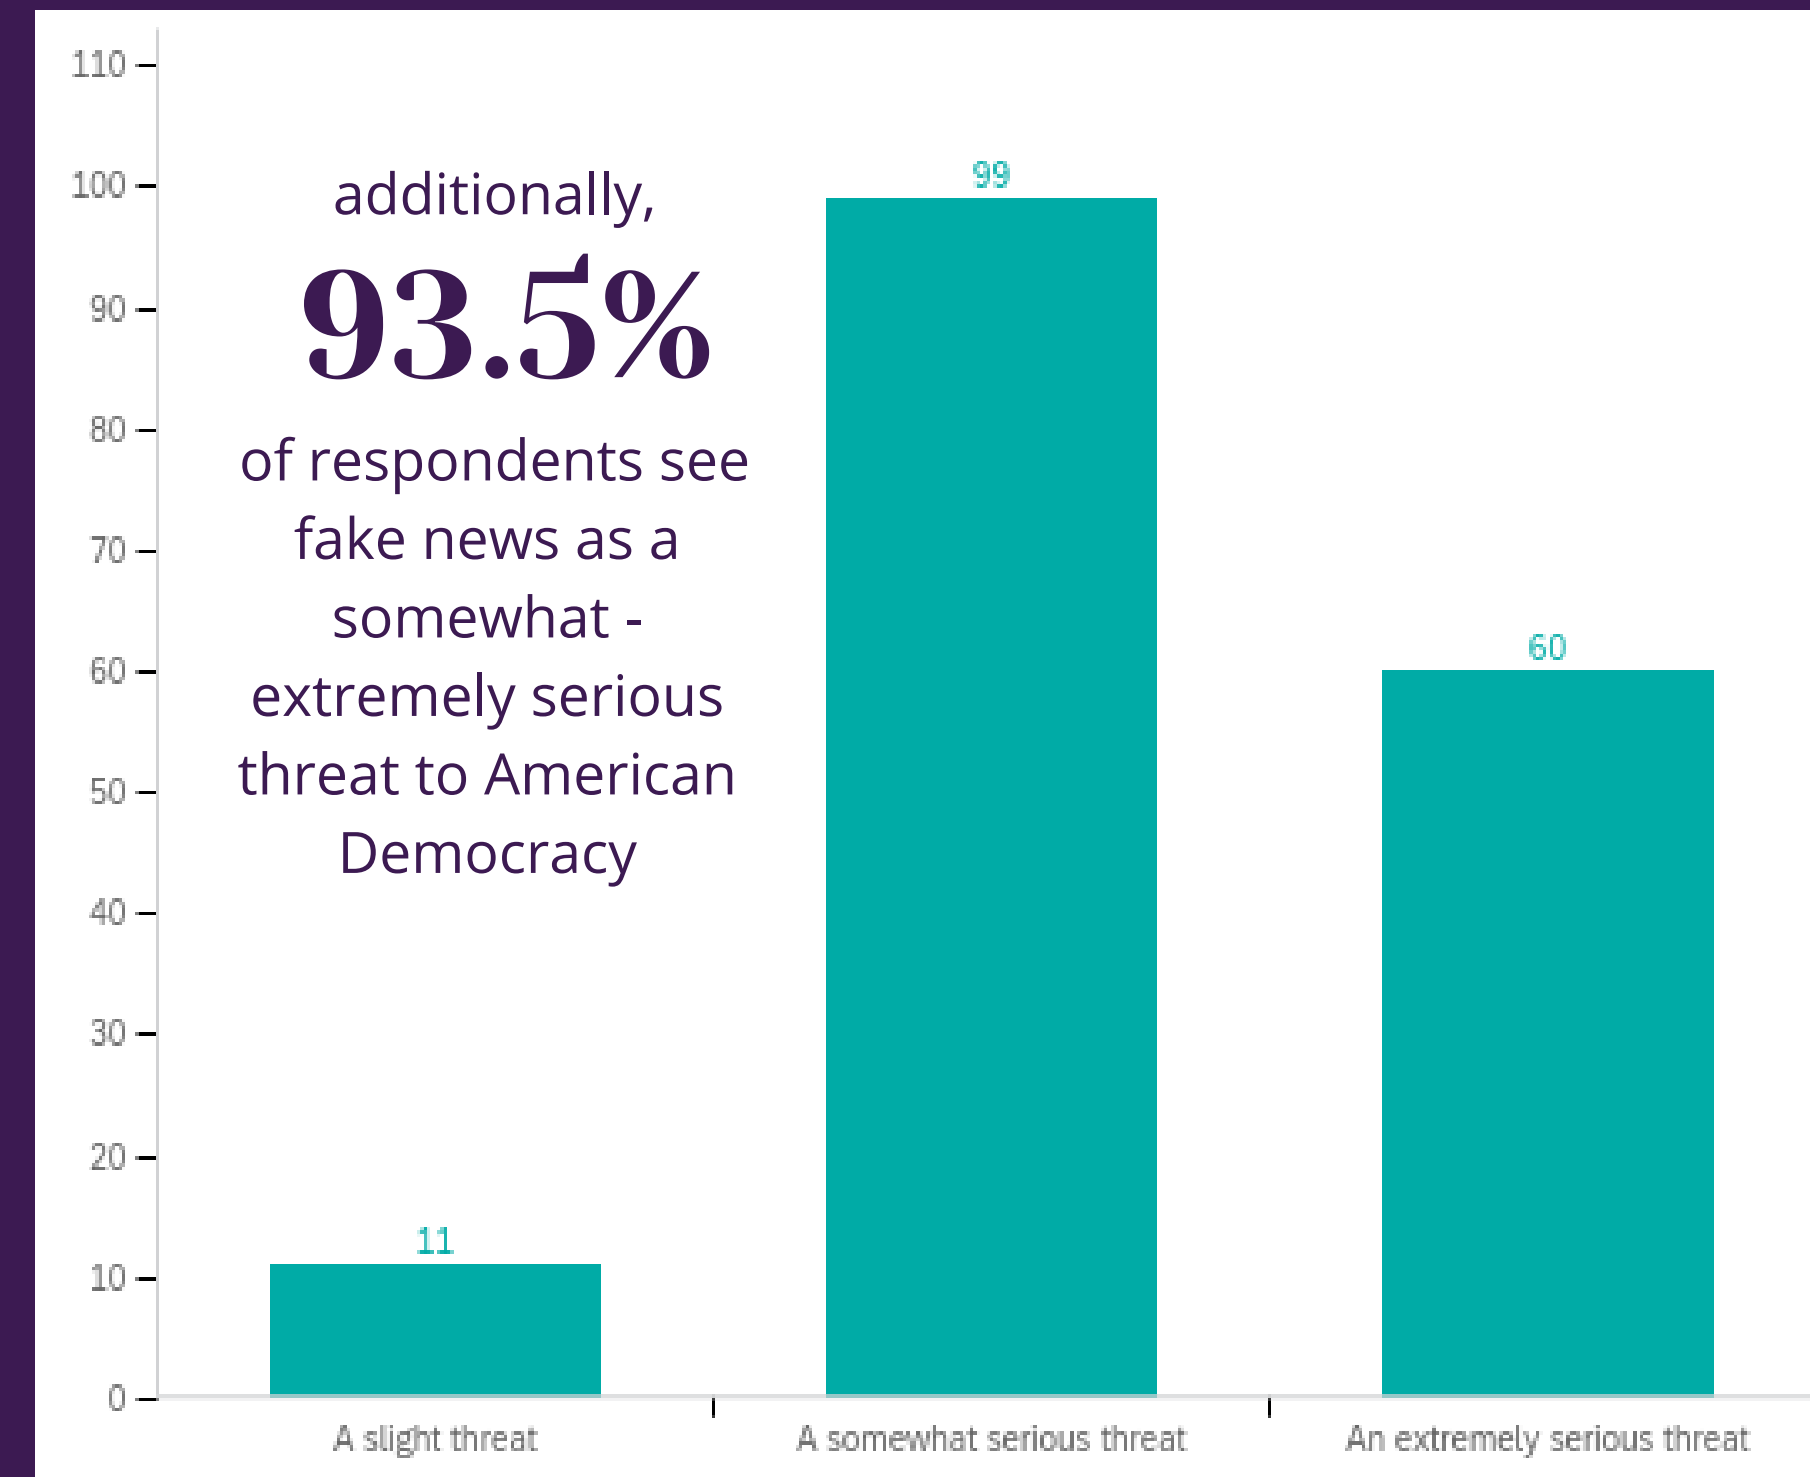

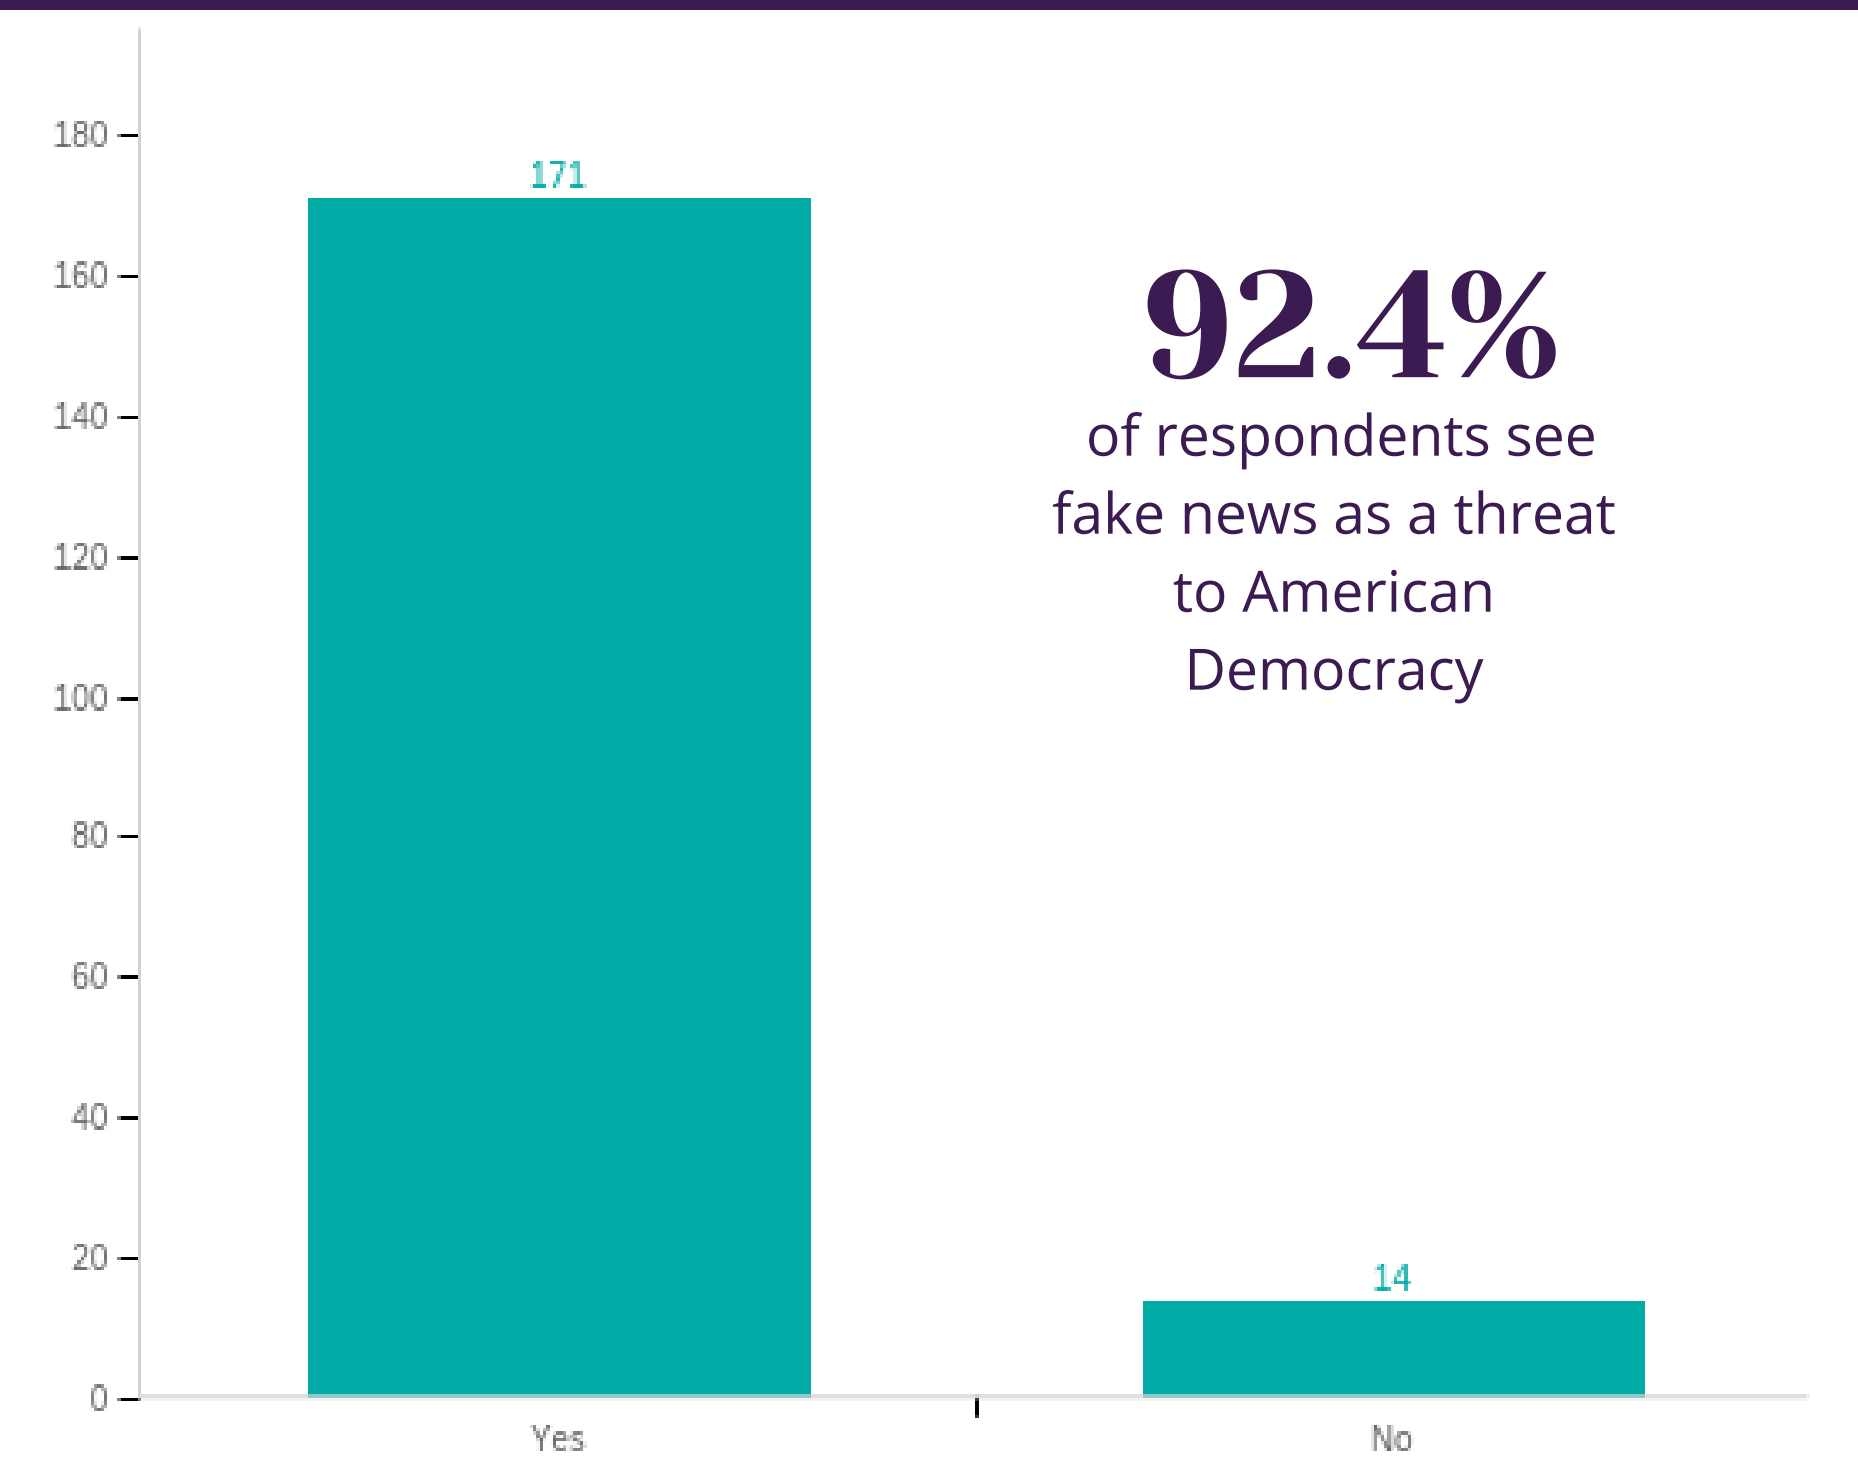

61.8%

Percentage of respondents who fact-check **half the time or more**

IS FAKE NEWS A THREAT?

NEWS LITERACY TRAINING

61.6%

The number of respondents who have never had a formal course on news literacy

60%

The number of respondents who think that students should be required to take a formal course on news literacy

IN CONCLUSION

College Students...

prefer to get their news from social media and digital channels,

but believe they are more likely to encounter fake news on digital channels as opposed to traditional sources

College Students...

believe being able to identify fake news is important,

but there are less students who feel confident in their own ability to recognize fake news

College Students...

believe fact-checking behaviors are important to engage in,

but only 61% of college students engage in fact-checking behaviors half the time or more
